🐦 RK-NerdyBirdy

EDUCATION

Vellore Institute of Technology,

July 2024 –Present

B.Tech. in Computer Science and Engineering Spl. Business systems- CGPA - 9.08

Vellore, India

Ralli International School

May 2022 – May 2024

High school - Physics, Chemistry, Maths and Computer Science - Percentage - 93.8%

Ghaziabad, India

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, R, HTML, CSS, Golang

Developer Tools: VS Code, Microsoft Azure, Cisco packet tracer

Technologies/Frameworks: Linux, GitHub, Git, Flask, FastAPI, Django, Tensorflow, Torch, OpenCV, Azure Functions, Kubernetes (KEDA), Docker

Professional Experience

KalkiFI AI Solutions Pvt. Ltd. 🔗

Sept 2024 – Sept 2025

AI/ML Engineering Intern

Vellore, India

- Architected an end-to-end violence detection pipeline by fine-tuning custom YOLOv11 models for high-accuracy frame analysis and deploying the real-time inference engine on AWS (EC2 + Lambda).
- Engineered a robust biometric attendance system leveraging FaceNet and ResNet architectures to automate identity verification and streamline employee check-ins.

PROJECTS

VIT Capstone portal (VCAP) | FastAPI, PostgreSQL, Redis, LaTeX

Apr 2026

- Digitized and standardized Capstone submissions for the **School of Computer Science (SCOPE)** at VIT, replacing fragmented manual workflows with a centralized platform that unified project tracking, automated report generation, and academic scoring for **2,000+ students, 400+ faculty, and 1,100+ projects**.
- Engineered an event-driven, KEDA-autoscaled background pipeline to asynchronously execute **dynamic LaTeX template injection and cryptographic stamping** across K8s Persistent Volumes, offloading CPU-intensive compilations to guarantee standardized, tamper-proof records with 100% API uptime during peak submission surges.

SthiraSense 🔗 | Python, Ensemble models, Scikit-Learn, Pandas

Feb 2026

- Achieved **92.21% precision on stablecoin depeg classification with only 0.14% false positives across minute-level OHLCV data**, by engineering a hybrid XGBoost + Random forest ensemble pipeline with SMOTE oversampling to handle severe class imbalance.

FloatChat 🔗 | FastAPI, Postgres, Langchain

Sept 2025

- Reduced oceanographic data retrieval from minutes of manual querying to **sub-second response times** for non-technical researchers across **13GB of ARGO records**, by building a RAG pipeline from scratch using FastAPI + LangChain with a PostgreSQL vectorized database and integrated geospatial visualizations.

Dhadkan 🔗 | TensorFlow, ESP32

Apr 2025

- Attained **98% heart rhythm classification accuracy in real-time on live ECG streams**, by deploying a **custom CNN pipeline** that ingests WebSocket data from an ESP32-connected AD8232 sensor and performs **on-the-fly beat detection and arrhythmia classification** and provides visualization and reporting capabilities. 🔗

EXTRACURRICULAR

Google Developer Groups on campus, VIT VELLORE 🔗

Apr 2025 – Present

Tech- Python

Vellore

- Selected for the Python domain out of a highly competitive pool of 3,950+ campus-wide applicants.
- Engineered an automated MCQ grading system deployed across GDG recruitment, **processing 6,000+ submissions and eliminating hours of manual grading.** 🔗
- Built backend for **HEXATHON'26**, one of the biggest designathon used by **300+ participants**

ACHIEVEMENTS

- **Won Fintech Track** out of 142 competing teams at Central Hack, VIT's flagship Yantra'26 hackathon, by delivering a production-ready stablecoin depeg early-warning system within a 24-hour build window. [!\[\]\(467d80e979964f7f8c752fb22248b5b7_img.jpg\)](#)
- **Selected as 1 of 30 finalist teams out of 300** in the Smart India Hackathon'25 (SIH) university round, by developing FloatChat as a solution to make large-scale oceanographic data accessible through natural language queries.
- **Won AgriHack** hosted by VIT VAIAL out of 26 competing university teams, by building a smart irrigation system fusing geolocation, weather forecasting, and hydrological calculations. [!\[\]\(b71552d33dbf62adf5e5199a70ee02bf_img.jpg\)](#)
